Finnmaster Husky is your natural choice when you want to explore life at sea, or when the urge to go even further out onto the sea is imminent. There are a lot of undiscovered adventures at sea and when you sit behind the wheel, it is you who decide what you want to experience. Just as experienced as energetic and adventurous.

For more than 25 years, we have manufactured GRP boats that have guided families to new experiences with a firm hand. If there is anything we have learned during all these years, it is which features that are of importance when you are out at sea. These features and smart solutions have been transferred to a series of aluminium boats. When we started to sketch out our new series, features such as reliability, safety, endurance and durability were the most important. The same characteristics that apply to the Husky dogs - hence the name Finnmaster Husky. A real athlete. Whatever the weather.

Naturally, Finnmaster Husky follows the well known Smart Design concept. We have prioritized a perfect foredeck, smart storage spaces and a world class cockpit as well as the best comfort for all on board. To ensure that Finnmaster Husky will run perfectly in both calm and rough sea, the features of the hull have been developed in collaboration with the best Finnish boat constructors. All in all, this entails that the Husky will guide you to new and unforgettable experiences.

Irrespective of whether it is one of the first crisp spring days with rough sea, or some of the last sunny autumn days before the ice settles.
