Best price guarantee - try us we will beat any genuine quote!!

What if you could hang a lighter, lower-horsepower FourStroke outboard on your transom without sacrificing speed, hole shot, driving experience or sheer pulling power? What if that outboard also delivered increased fuel savings, hassle-free maintenance and rugged reliability? Less weight and high displacement mean Mariner's new 75 - 115hp FourStrokes generate abundant torque and immediate power. Because they don't have to work as hard as heavier engines or those with lower displacement, these engines make boats plane faster, accelerate better and provide optimal fuel efficiency at cruising speed.
