NEW Yamaha F350AET Four Stroke Outboard Engine

Electronic ' Drive-By-Wire' throttle and shift

Extra Long Shaft, Remote Control, Electric Start, Power Trim & Tilt

CONTACT FOR BEST PRICE

Created for the heavy-duty demands of large offshore boats, the 5.3 litre Yamaha F350 is a mighty technological pioneer. This 4-stroke V8 is the world's largest displacement outboard, combining unique levels of power and torque with the refined performance required by today's sophisticated hull designs.

Yamaha's EFI (Electronic Fuel Injection) delivers smooth performance and maximum fuel efficiency across the power band - and despite its size and power, Yamaha's weight-saving technologies have made the F350 surprisingly light and compact too.

With the PrimeStart™ system, starting is as easy as in your car – and digital drive-by-wire technology keeps you in precise control.

- Shift Dampener System (SDS) for smoother shifting
- Precise digital electronic throttle/shift control
- Digital Network Gauges (Conventional and Premium)
- One-touch 'Start/Stop' control option
- High-output alternator
- V8 power with EFI (Electronic Fuel Injection)

- Engine synchronisation (twin/triple installations)
- Tilt Limiter system fitted as standard
- Variable trolling RPM
- Dual Battery charging system option
- Anti-knock control sensor
