Highfield Ultralite 340 – PVC UL340 With Honda BF10 £4,429 inc

Rob Perry Marine are a premier Highfield dealer with full rigging facilities and fast access to UK stock.

We currently have available units that are currently unrigged so engine choice, seating arrangement can still be made.

The advertised price includes Valmex® Mainstream plus PVC tube fabric, welded seams, flush mount non-return valves, high tensile chromated & powder coated aluminium hull, removable seat, lifting points and towing eyes, tow bridle points, anti-slip deck, heavy duty rubbing strake, full length keel guard, under seat bag, highfield dry bag, foot pump, oars & repair kit.

Engine choices are very much dependant on use but typically for the 340 this would be 10Hp Honda with recoil start and tiller which is reflected in the advertised price. We are happy to discuss any special requirements as well so please just ask.

Because weight does matter, this single deck dinghy has been conceived keeping that motto in mind. Their light weight make them a real alternative for those who may have chosen a soft bottom tender in the past but would prefer a hard hull for its performance. Ultralite tenders are roomy and strong, yet light and easy to transport. These little boats can be launched and recovered by a single man and are easy to be transported on a roof rack.

You will be impressed by their obvious quality level. The excellence of the finish only compares the detail of the ergonomics. The simple layout is combined with an uncluttered design and numerous standard accessories complete the picture.

The Ultralite's are made of 2-2.5mm thick powder coated marine grade aluminium for the hull and 1100 Dtex fabric for the inflatable tube.
