August Race - Used internationally by some of the worlds leading RIB manufacturers.

August Race Liquid RIB is capable of cleaning both Hypalon and PVC tubes and can truly bring your RIB back to life.

We recommend using Liquid RIB UV to protect your RIB following a Liquid RIB application.

August Race Liquid RIB UV is a spray-applied conditioning/protective UV treatment for PVC or Hypalon RIB tubes that gives long-lasting protection against both salt and UV damage. Liquid RIB UV will quickly absorb into the tube fabric to give great results that can last up to 1 year.

We recommend using Liquid RIB to clean and revive your RIB tubes before using Liquid RIB UV to condition and protect.

Both in stock in 1000 mil sizes at only £21.95 inc VAT each (August Race on line price direct is £19.95 for only 1/2 this size, ie 500 mil)

We also sell the amazing

Mould Spot Treatment 500 mil at only £18.99
and
HYDROPHOBIC
RIB LR Sealer Coat, 250 mil for £21.99
which is so clever and effective

August Race™ Spot Off is a low foaming mould spot remover for use on a variety of surfaces including RIB tubes, vinyl upholstery and paint. It's great on RIB rubbing strakes especially hypalon. Less aggressive than conventional bleaching agents, Spot Off gives amazing results fast. (N.B. Please ensure to follow the label instructions for the most effective method of application).

August Race LR Sealer Coat is a semi-permanent cross linking polymer coating formulated to help prevent water spotting/ absorption on inflatable RIB tubes.

LR Sealer coat leaves a silky finish to tubes and can even be used on fabric impression material to leave an even finish.

LR Sealer Coat is environmentally friendly and 100% bio-degradable.

All August Race products are made in the UK
