● House Boats ● United Kingdom ● Rochester ● 2017

Premier Houseboats are pleased to present this good sized fibre glass pontoon, built in 2017 it is now ready to be used as a houseboat base or commercially.

The structure is timber framed and filled with solid closed cell polystyrene. It is finished with 18 mm marine ply and seven layers of fibre glass.

If you have a mooring, it is ideal to put a mobile home on top for a relatively cheap and easy houseboat. It could be just as easily used commercially, but either way you will need to find somewhere to moor the pontoon. The pontoon is freehold but it doesn't have a mooring.

Vessel name: Fibre Glass pontoon

Vessel condition: Good

Builder: Justin Hodder

Year constructed: 2017

Length over all: 54'

Beam: 12'

Maximum draft: 2'

Hull material: Glass Fibre

Hull type: Flat
