Flexible and powerful enough to be the heart of a simple system, or one of many Actisense products in a more complex system. The Actisense NDC-4 allows up to five NMEA 0183 sources to be multiplexed into a single stream*. Two flexible ISO-Drive outputs allow two different downstream talker baud rates to be created, ensuring maximum system flexibility. Did you find apk for android? You can find new Free Android Games and apps. SKU: NDC-4 Category: Electrical Components
