● Inflatable Boats ● United Kingdom ● 1.6 m/5 ft ● 1

The Talamex Greenline GLS is a boat without an inflatable keel and developed to be ready to sail quickly and can be packed small so it can be transported easily. Despite the small size of 160cm, the boat has - thanks to the transom placed far behind - more interior space than other boats in its class. Also, the boat is very light weight which makes launching very easy.

In the standard package of the Talamex inflatable boats you will find:
repair kit, sliding seat, paddles, stainless steel towing eyes, mooring line, stowbag, fender on the boats for extra protection and a hand pump.

The boats are available with a slatted, air floor or aluminium floor, in length ranging from 200cm till 350cm.

On all boats is a 2 year warranty and all Talamex boats are - if necessary - CE certified by the Dutch Marine Inspection making them meet all European requirements!

Splash Marine Supplies stocks the Talamex range of Inflatable Boats and RIBS. Given the European design and quality, the Talamex range of boats are the best value on the market today!

Packages available with Mercury and Mariner outboard engines.
