New Large Inboard Motor Double Flush Muff with Hoze Lock Connector Double flusher with large rectangle rubber suction cups for larger intakes. Extended bracket for use on Mercruisers and larger engines. With hoze lock connector for an easy fit on your garden hose. Simple installation by attaching to hose Unlike most flushers there is no need to remove your hose end as these are supplied with a hoze lock connector. Also the large bracket on these flushers allow them for use on most Mercruisers. These motor flushers / flush muffs are an essential item to the maintenance of any outboard engine. It is advised to flush your engine after every trip, both salt and fresh water. Flushing your engine will extend the life of you engine and prevent salt clogging the water cooling system and the corroding of internal parts. These are a great value product to prevent a costly engine failure due to sand, grit and salt. Our items are in stock, ready for immediate dispatch
