The Corsiva 475 is the smallest option in the classic open boat range. Offering the luxuries of the larger boats in the range, the 475 represents excellent value. The level of standard equipment and options is impressive, making it easy to create the exact boat you desire. Her clinker-styled hull oozes style and class and is available in a range of colours. Her steering console is cleverly moulded into the port side of the boat, providing a generous seating area around a table. Alternatively, use the table as an infill and make the most of the weather with the optional sundeck area. Rated to Category C (Inshore) and capable of taking up to a 30hp outboard the 475 is ideal for inland or inshore use. She can be used for family days out with a picnic or a fishing trip with friends! Seating capacity 4/5
